

US SALARY BANDS AND JOB CLASSIFICATIONS

Salary bands and job classifications helps Rainforest Alliance offer equitable, competitive salaries and map out your path to growth and higher pay. The salary ranges in the table reflect base salaries paid for all positions at a given level and at a given location: New York City, Washington DC, and Other US locations. The amount will also vary based on the position and your relevant experience. No one will be paid below the minimum. Every position has a job classification level, as stated on the job posting. Local HR administers the compensation system for employees in their country, evaluating jobs and determining the grade of each position based on professional knowledge, skills, required education and experience and job responsibilities; external benchmarks; and the complexity and scope relative to other similar positions. The ranges reflect a 35 hour work-week. Certain technical jobs fall under the premium range. The majority of the roles within the Rainforest Alliance sit on the regular salary bands.
