MEASURES TO ADDRESS SHORTAGES OF RAINFOREST ALLIANCE COFFEE CERTIFIED VOLUMES DURING THE TRANSITION PERIOD

- 1) The timing of the audit season for the first transition audits for coffee in Brazil is leading to restrictions to available volumes of Rainforest Alliance certified coffee. The Rainforest Alliance will consider requests to pre-authorise a percentage of the current 2022 harvest volumes to enable farm CH who have already had their transition audit against the 2020 Standard to transact certified volumes while they finalize the process to obtain their first transition certificate.
- 2) Requests for pre-authorisation of up to 50% of the estimated volume for the current 2022 harvest, with a validity of 3 months, may be made by Farm Certificate holders who:
 - a) Are currently certified under the UTZ or Rainforest Alliance 2017 certification programs;
 - b) Have completed registration for the 2020 Rainforest Alliance certification program, including:
 - i. Definition of Certification Scope.
 - ii. Submission of Self-assessment in the RACP.
 - iii. Submission of the Group Member Registry (for groups).
 - iv. Submission of polygon data (for individual farms).
 - c) Have conducted their first transition audit during the required harvest period window for their crop (which is defined as three months after the official start of the harvest season);
 - d) At the closing meeting of the audit, have no open non-conformities related to traceability, payment of premium, use of banned pesticides, deforestation or unremediated cases of forced labour
 - e) Demonstrate compliance with [Policy: Audits for Certificate Holders based in Brazil](#). Evidence requested in this policy must be sent together with the pre-authorization request.
- 3) The Rainforest Alliance reserves the right to cancel the preauthorised volumes if the certificate holder does not close their non-conformities and receive a transition certificate within 3 months.
- 4) Farm certificate holders who wish to apply for pre-authorisation of volumes under the conditions set out in clause 2 above, in order to have time to complete their transition audit, shall send the request to the CB.
- 5) The CB will submit the request to Rainforest Alliance together with the CH RA ID number and required documentation to email address cbcert@ra.org.
- 6) The Rainforest Alliance will pre-authorise volumes on a case-by-case basis following a thorough assessment of risks.
- 7) The Rainforest Alliance will pre-authorise volumes directly in the RACP.
- 8) Pre-authorised volumes will be incorporated in the total volume approved with the transition certificate once this is issued. They are not additional to the annual approved volume.
- 9) No preauthorisation of volumes will be granted for CHs doing their second transition audit.

- 10) The farm certificate holder must comply with the closure of the non-conformities identified during the audit within the 10 week period set out in the Rainforest Alliance Auditing and Certification Rules and the Policy on changes to the Auditing and Certification Rules for audits in the transition year. (see <https://www.rainforest-alliance.org/resource-item/policy-on-changes-to-certification-and-auditing-rules-for-audits-in-the-transition-year/>). Failure to comply with these rules will result in a non-certification decision and the cancellation of the preauthorised volumes in the Rainforest Alliance Traceability System.
- 11) Farm certificate holders who do not complete the closure of their non conformities within the 10 week period will not be able to sell any volumes as Rainforest Alliance certified until they have successfully passed a new audit and received a valid certificate and licence in accordance with the Rainforest Alliance Auditing and Certification Rules.
