# 1. Introduction

The European Union (EU) has introduced the EU Deforestation Regulation (EUDR), which includes requirements on deforestation for a range of products that are imported into the EU. The requirements of the EUDR need to be met by December 30, 2024. For products Rainforest Alliance certifies, the EUDR currently impacts cocoa and coffee.

The Rainforest Alliance has set up systems to support producers and supply chain actors to meet the requirements of the EUDR. In addition to the Rainforest Alliance's standard requirements that already align with the EUDR, four self-selected requirements have been introduced to cover aspects of the EUDR that were not fully aligned. These requirements are only applicable to Farm Certificate Holders.

Certified farms can choose to implement these additional requirements and have these covered in their audits to support actors further down their supply chains to comply with the EUDR and continue selling their products on the EU market. For further information, please refer to the webpage <https://www.rainforest-alliance.org/business/certification/how-the-rainforest-alliance-supports-eudr-compliance-from-farm-to-retailer/>.

# 2. Requirements for Farms

Farm Certificate Holders can choose the self-selected EUDR requirements during their registration in the Rainforest Alliance Certification Platform (RACP). These requirements are added on top of the Standard requirements. In groups, group management is responsible to cover the requirements for all small and large farms.

If the Farm Certificate Holder passes the Rainforest Alliance audit and all EUDR requirements, this is made visible in the List of Certified Farms on the Rainforest Alliance website.

The requirements for alignment with the EUDR are:

No.	Additional Requirement	Group Certification			Ind. Cert
		S-farms	L-farms	Group mgt.	S/L
<b>EUDR1</b>	Polygons are available for all farm units of 4ha and above. Geolocation points are available for all other farm units.		✓	✓	✓
<b>EUDR2</b>	Geolocation data for both points and polygons must have 6 decimals.		✓	✓	✓
<b>EUDR3</b>	Management implements measures to prevent and address potential cases of corruption (including bribery and extortion), fraud and nepotism by: - A written public statement that is communicated to group members/workers and supply chain partners		✓	✓	✓

	<ul style="list-style-type: none"><li>- Training of management and workers/group members to raise awareness of possible forms, at least annually</li><li>- Taking measures to avoid, and to remediate cases</li></ul>				
<b>EUDR4</b>	Management shows evidence of payment of all applicable fees, royalties, taxes and other charges as prescribed by local laws and regulations.				

### 3. Data sharing

Rainforest Alliance may share information regarding compliance with the above requirements, including geolocation data and deforestation risk assessments, under the EUDR Data Sharing Policy.
