WELCOME TO THE RAINFOREST ALLIANCE SEAL

We've created this guide to make sure we all use the Rainforest Alliance seals in consistent, credible ways to ensure they become recognized symbols of our movement for a better world. This guide defines what our seals mean and shows you how they can be used on your products.

By using our seals, your company can show the world that you are helping create a world where people and nature thrive in harmony. Our seals are symbols for continuous progress, and markers of an alliance committed to driving economic development, building resilient communities, and protecting our environment.

We also know the brands that make up our alliance are at different stages of their sustainability journeys. So, if you're not yet certified, or are going above and beyond, this guide will describe how you can show your customers that you are part of an alliance for people and nature. Any use of our name or seal must follow the Labeling and Claims Policy. Click [here](#) for more information.

OUR SEALS ARE SYMBOLS OF CHANGE

For decades, we've been creating a more sustainable world by using social and market forces to protect nature and improve the lives of farmers and forest communities. By bringing diverse allies together, we are making deep-rooted change on some of our most pressing social and environmental issues.

Our alliance is all about transforming the way the world produces, sources, and consumes. Together with farmers and forest communities, companies, and consumers, we're all in to create a thriving future.

WHAT THE RAINFOREST ALLIANCE SEAL STANDS FOR

Our certification program—including the Rainforest Alliance’s Sustainable Agriculture Certification and Regenerative Agriculture Certification—supports better farmer livelihoods, human rights, good environmental practices, and climate resilience.

It shows consumers that these products have met rigorous requirements to help build a better world for people and nature.

The Rainforest Alliance seal is a bold mark of change.

It represents a vision of sustainability based on continuous improvement, transparency, and shared responsibility between farmers, companies, and forest communities. Because only together can we restore the harmony between people and nature and create a world where we thrive together.

USING THE SEAL

What is the seal?

The Rainforest Alliance seal is a bold mark of change. It's a symbol for hope, action and progress. A way for brands to tell the story about the good that goes into their products.

It shows consumers that farmer, foresters and companies are taking steps to make their products more sustainable, creating a better future for people and nature.

Contact customersuccess@ra.org with questions. Text statements must also be submitted to the Rainforest Alliance for prior written approval.

Official Rainforest Alliance Sustainable Agriculture seal

Horizontal version

Vertical version

Who can use our seal?

It can be used by :

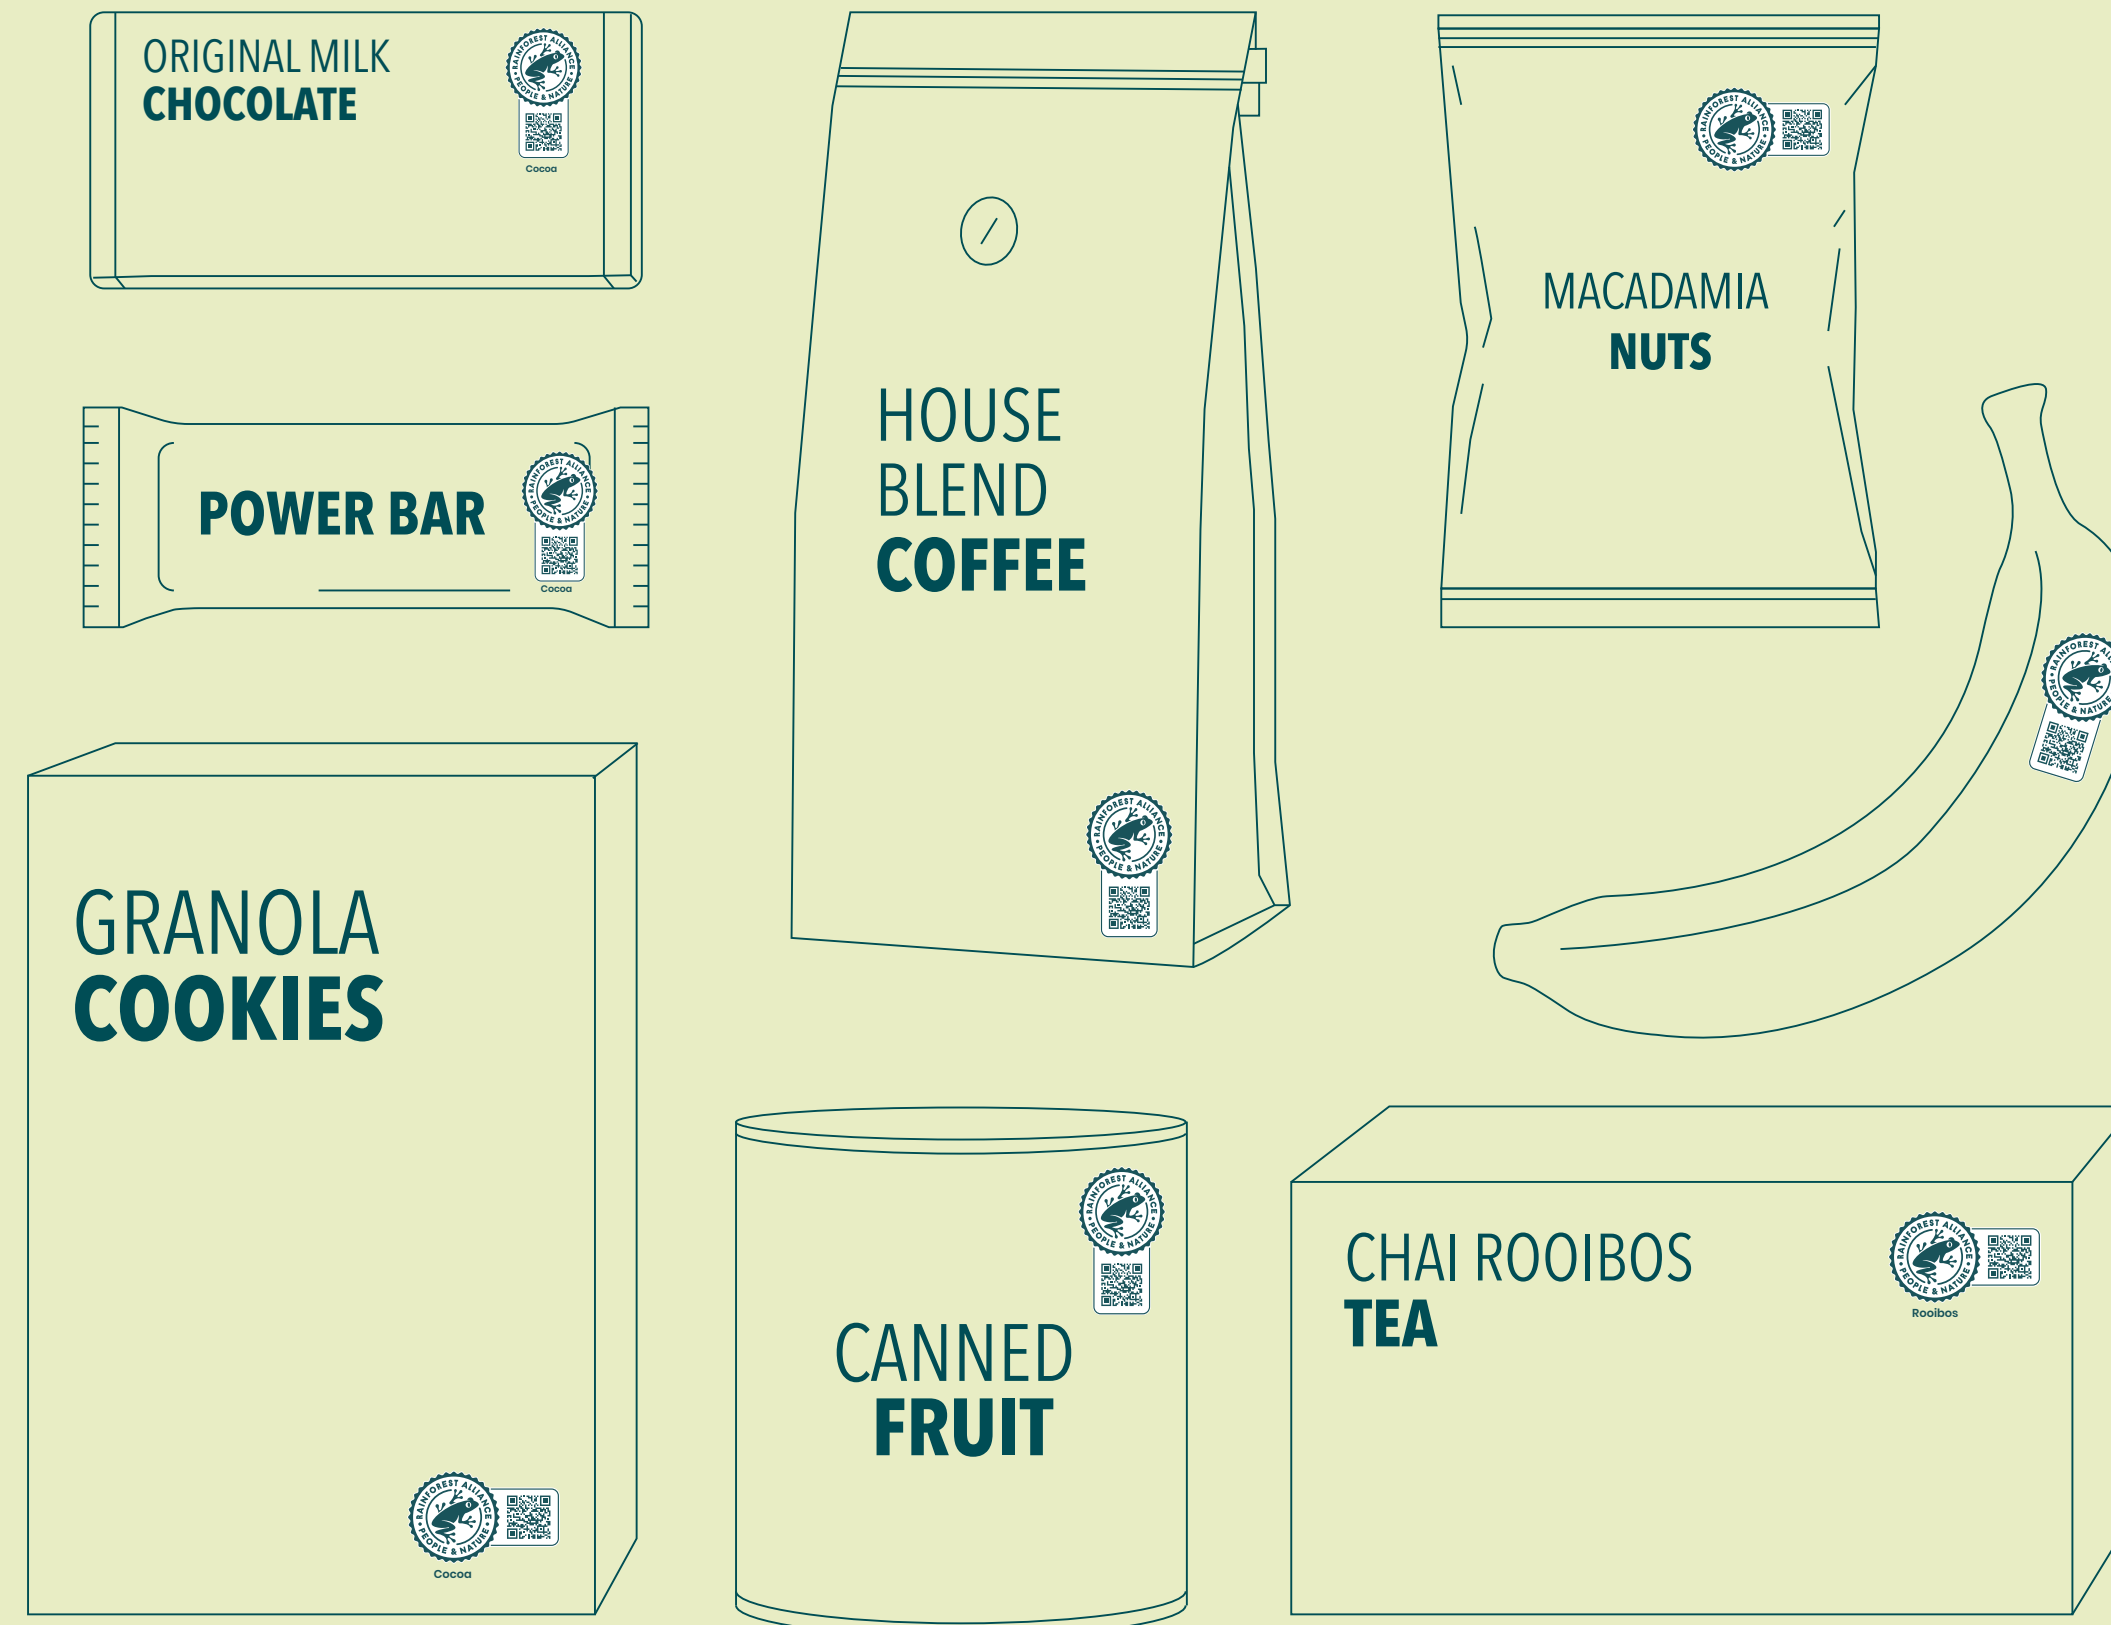

- Farm enterprises that meet the Rainforest Alliance Sustainable Agriculture Standard.
- Businesses that sell products from these certified farms (with a signed License Agreement (2020 Version)).

Where can the seal be used?

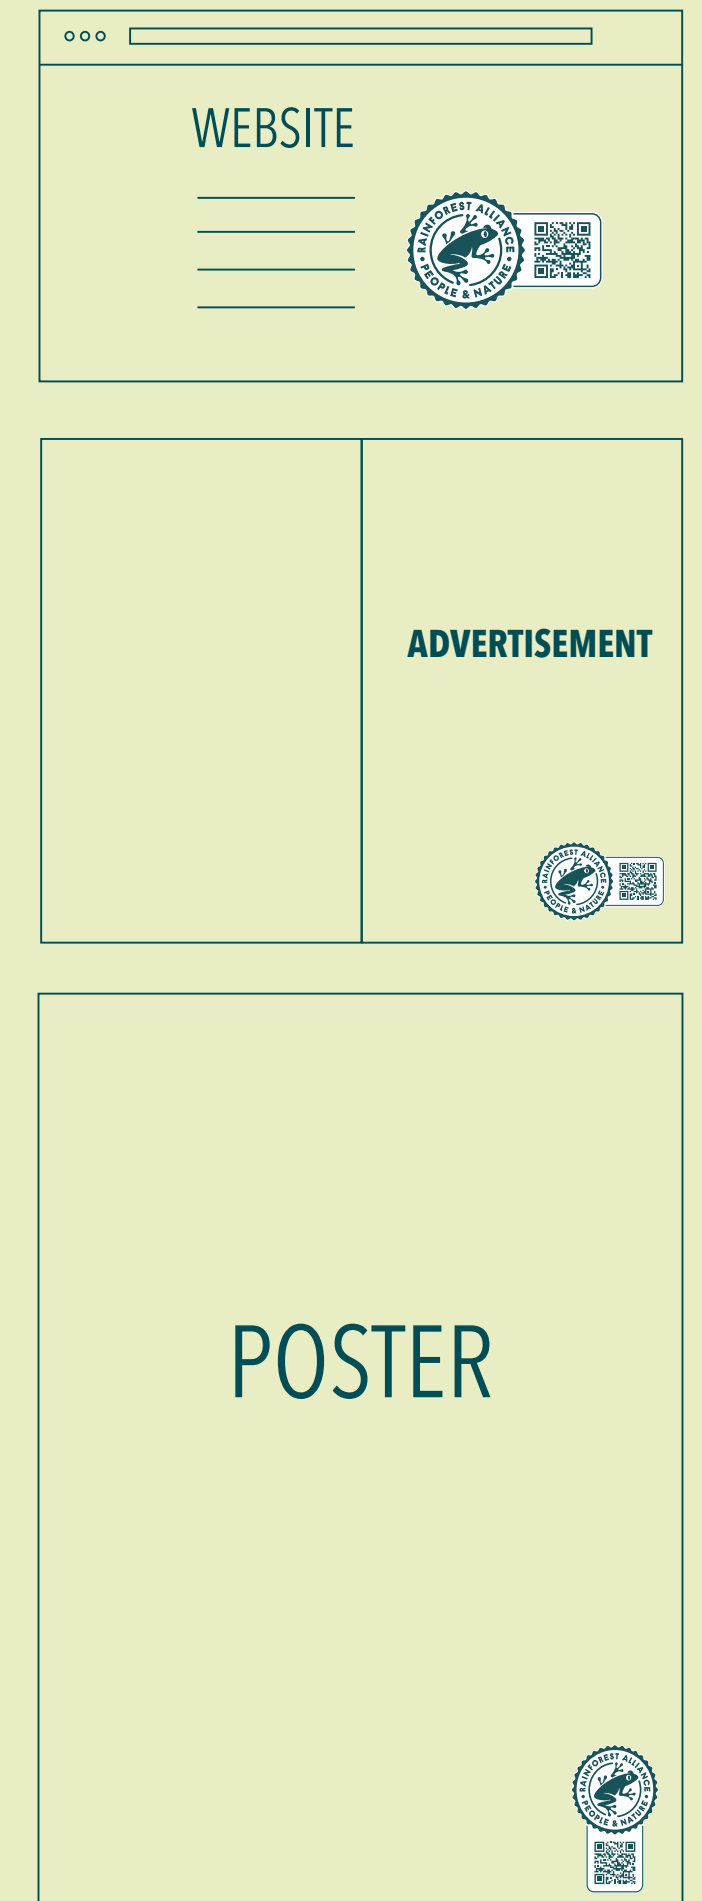

You can use the seal on:

- Rainforest Alliance Certified products.
- Marketing materials related to products carrying the seal.
 - On these materials, the seal should always be accompanied by a reference to our website ra.org for more info, or to ra.org/seal when there's a possibility to hyperlink.
 - With regard to video materials, the URL can be included on the place where the video is hosted (e.g. YouTube video description, website, email newsletter, etc)
- Corporate communications about sourcing Rainforest Alliance Certified crops.

Examples of seals on marketing materials

Color breakdown

The Rainforest Alliance seal is available in our primary color pairing of green with or without white. The secondary pairing is black with or without white. The seal should appear in Pantone 3165 green or the equivalent CMYK or RGB values on the right.

The green or black single-color versions may be used when the seal is printed over light colored materials or backgrounds.

In special cases only, (where other text and graphics are being printed in white over a darker background) the Rainforest Alliance seal reverse white version may be used. As the reverse white version is not an inverse version of the green or black single-color, please make sure the right design file is used.

In specific cases where using one of our brand colors is technically not feasible, companies can apply for an exception. In these cases, only colors close, or similar to, our primary green and black brand colors, and part of the brand's color palette, may be considered. Only in the case of monochrome packaging, can the seal be printed in the color used on pack.

Placement

To ensure that the Rainforest Alliance seal is never compromised, the seal should stand alone so that it does not compete with existing text, graphics or images, including other certification marks.

The seal should never be displayed in a position or size where it could be confused with a business name, or a brand name of a product, or in any way that implies endorsement of initiatives not applicable to the Rainforest Alliance.

The seal should be placed prominently in order to maximize visibility and recognition.

The Rainforest Alliance seal must never be printed across a fold line or wrap around a corner.

Exclusion zone

To ensure the highest visual impact of the Rainforest Alliance seal, a minimum clear area must be maintained. Clear space around the seal should be equal to the height of 3 times 'R' of Rainforest Alliance (this results in a circle 1.41 times the size of the seal), as seen on the diagram shown.

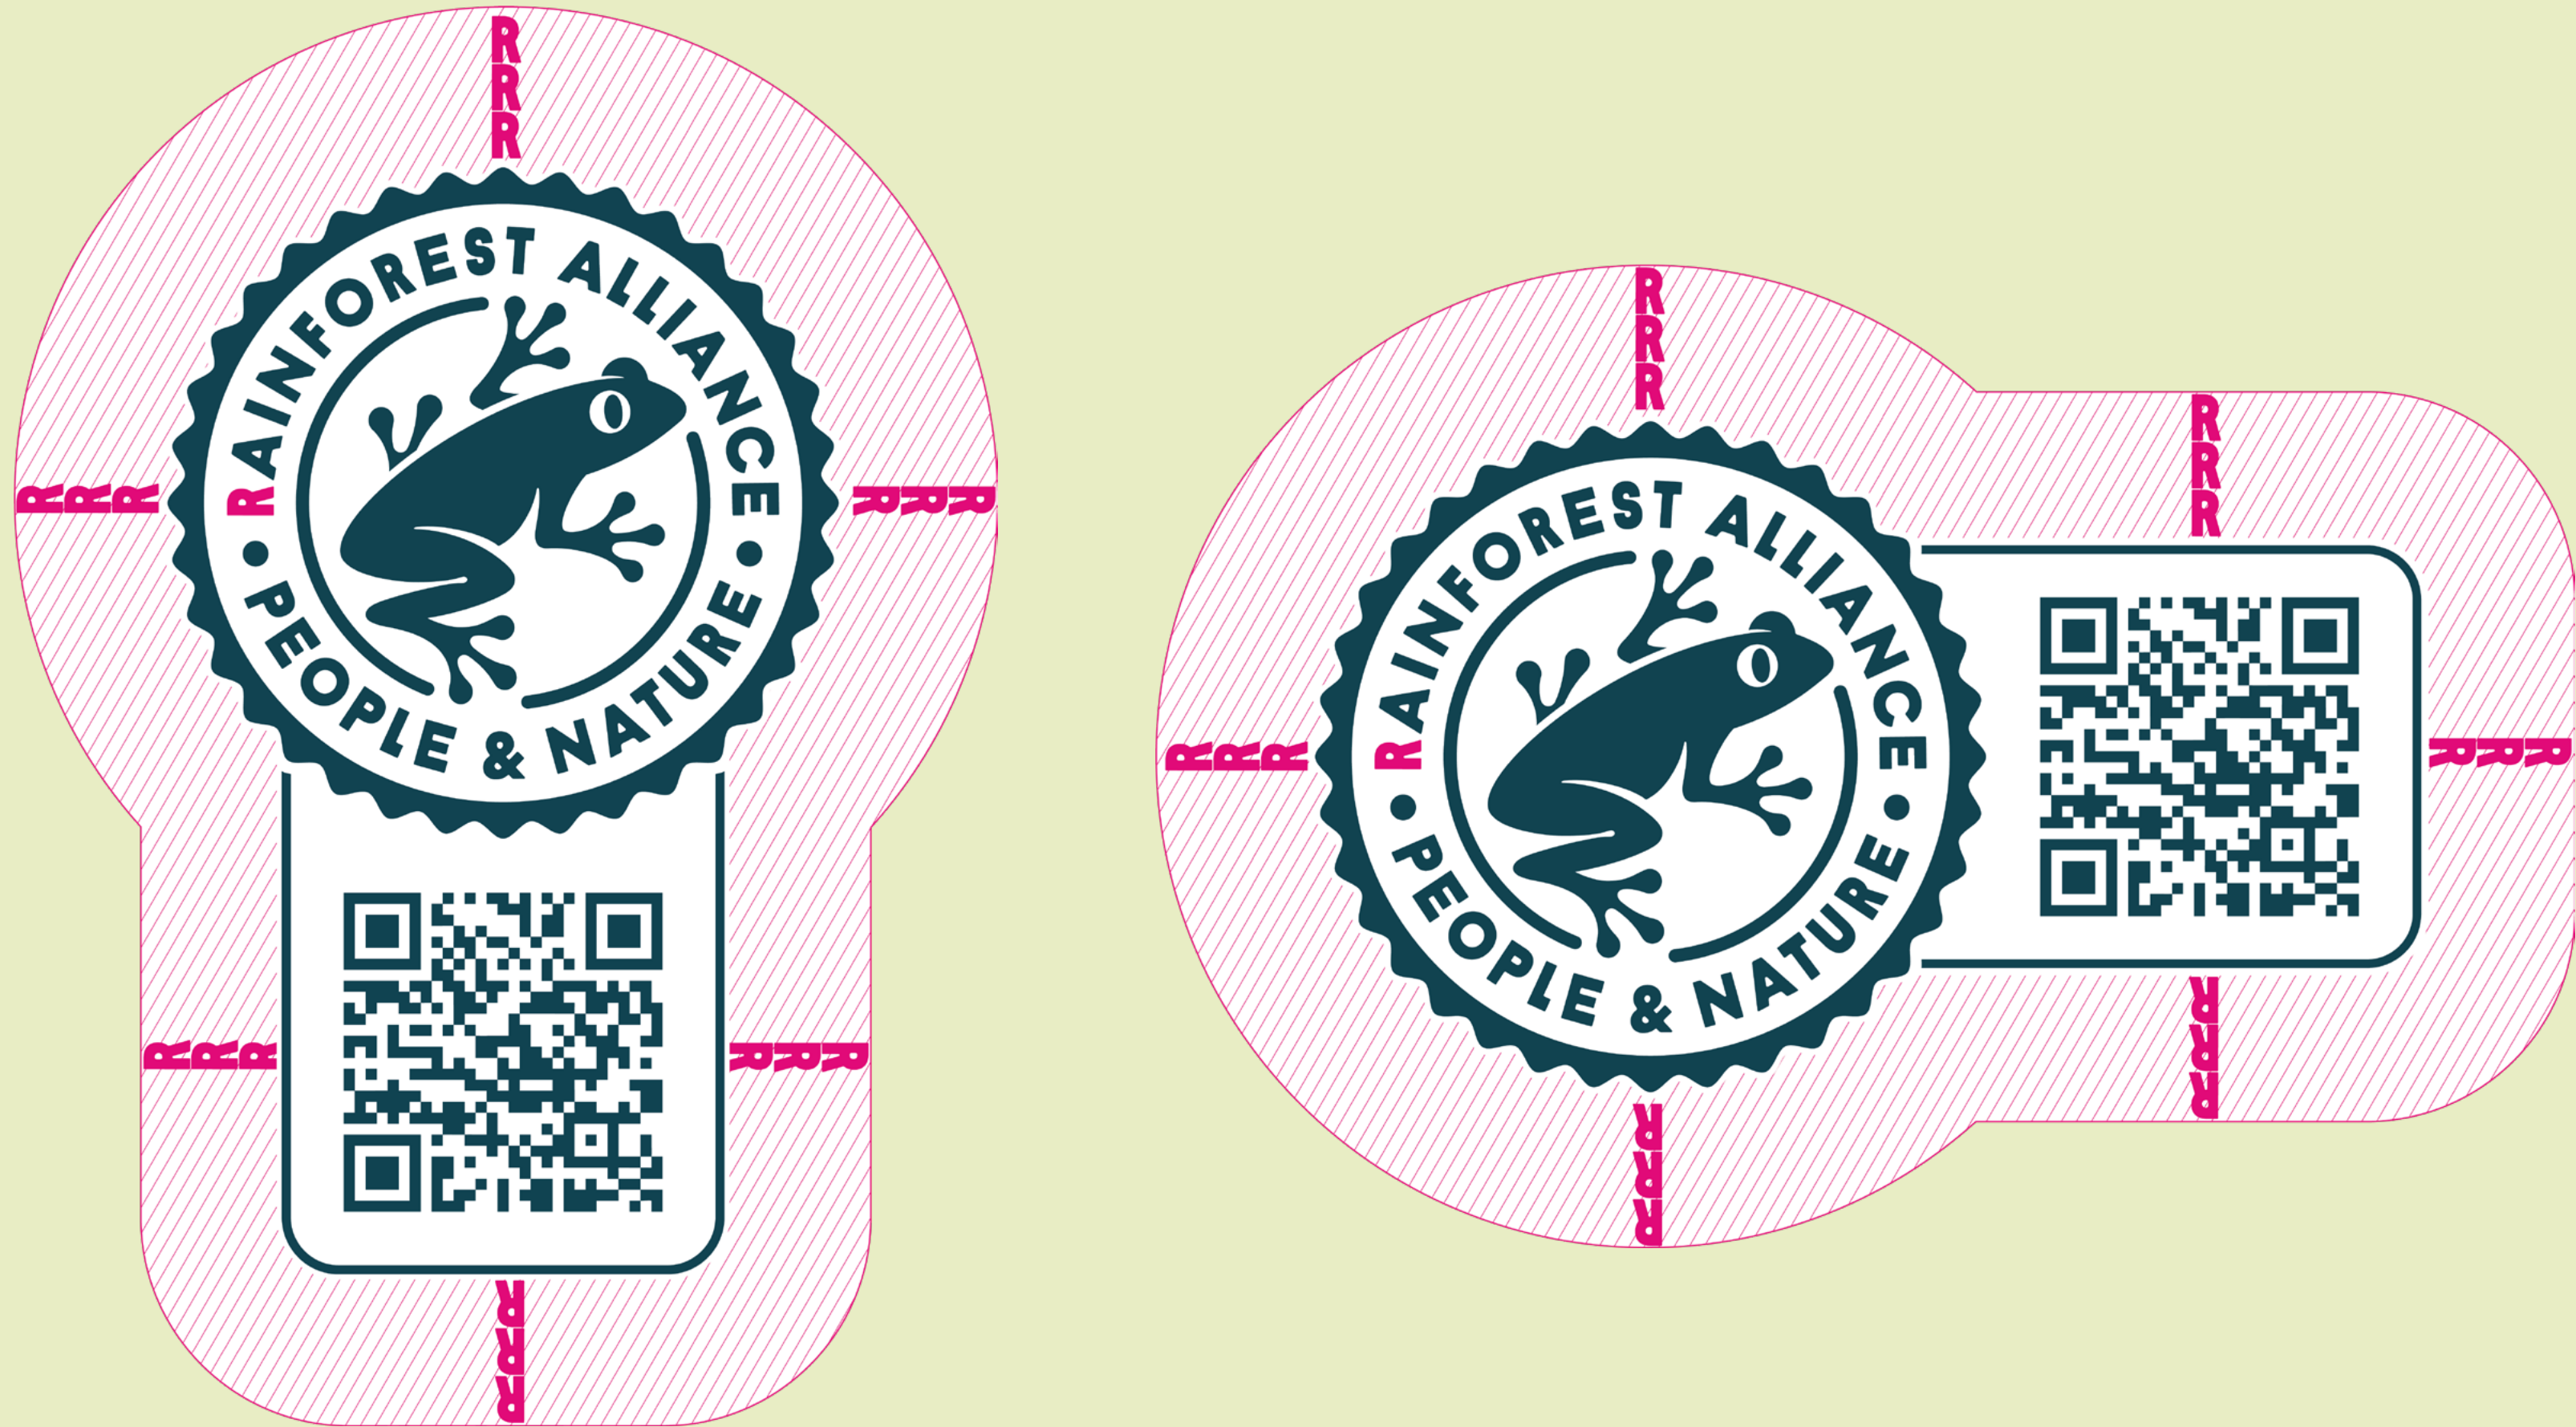

No other competing elements should appear in this space, such as other logos or text.

The Rainforest Alliance seal may be placed on top of background photography and/or pattern, using the two color-version with white fill.

Languages

We do not offer translations of the seal in any language other than English.

Exclusion Zone
(equal to 1.41 x the size of the seal)

'R' Height

Minimum size

To ensure that the QR code remains scannable, the vertical version of the Rainforest Alliance seal should never be used below the minimum size of 2.7 cm wide.

The horizontal version of the Rainforest Alliance seal should never be used below the minimum size of 2.7 cm tall.

Please see pages 13-14 of this guide for further sizing guidance.

Minimum size

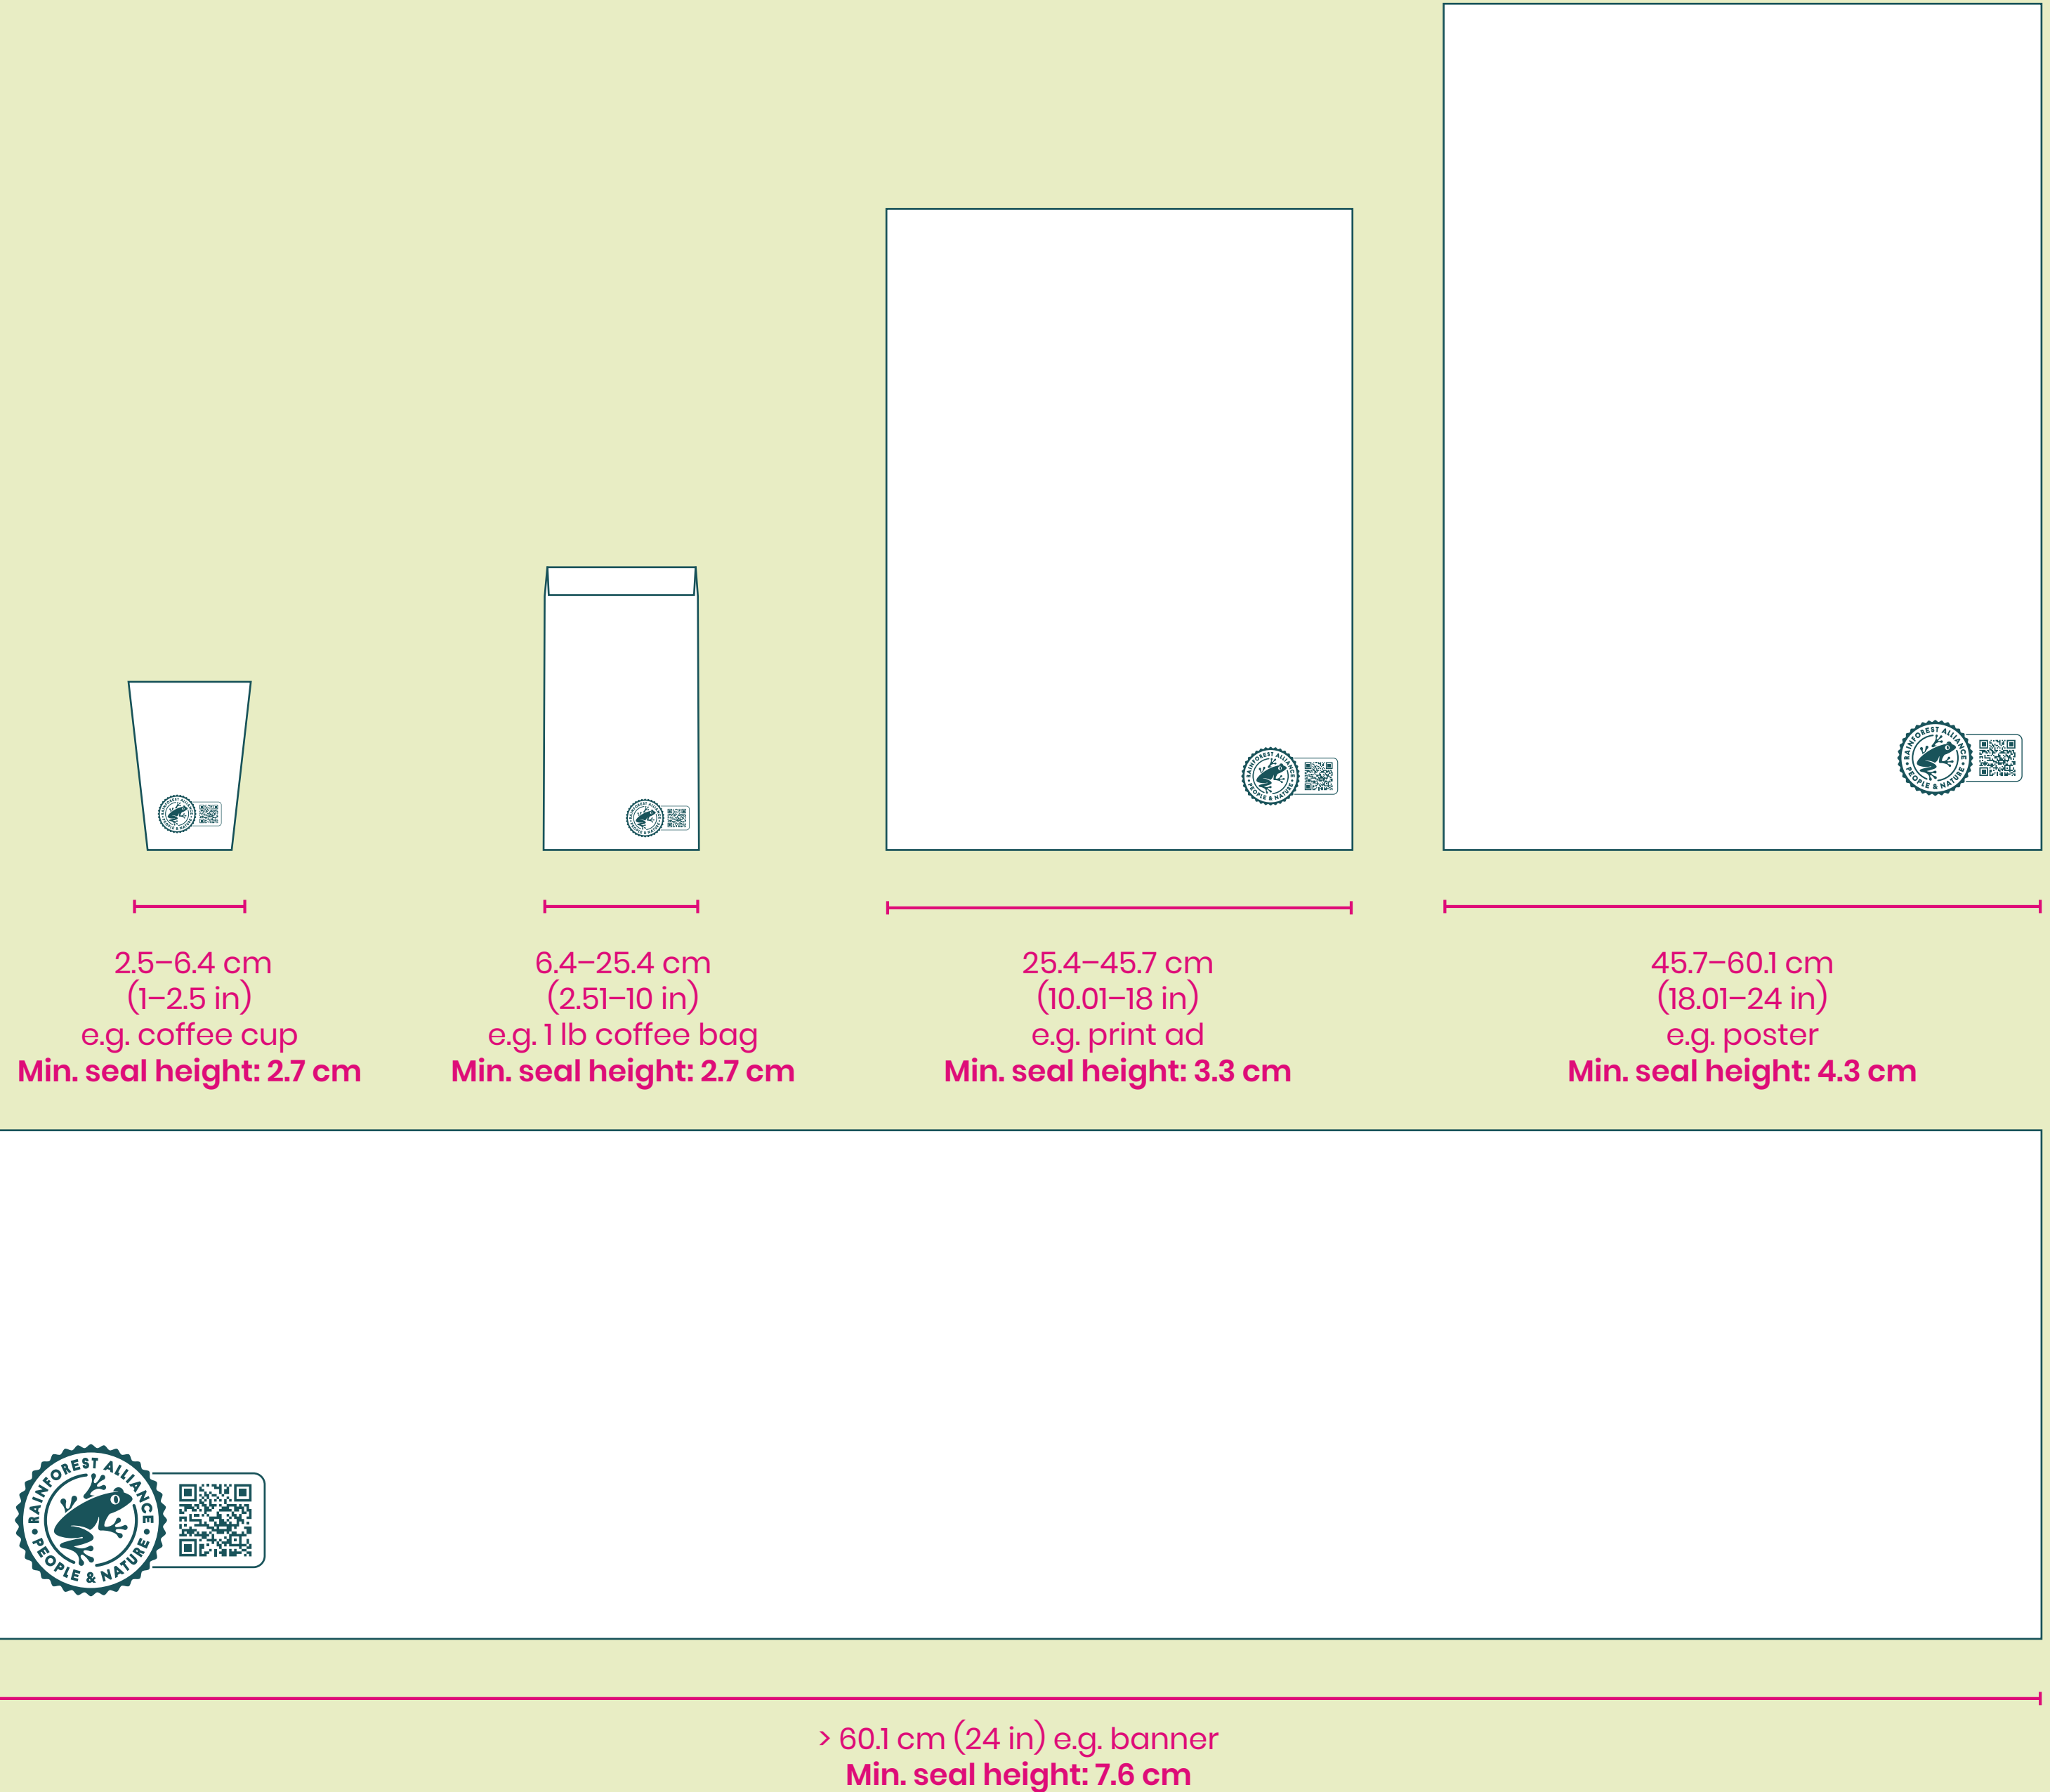

If you're using the seal on large marketing materials such as banners or displays, the size of the seal must be increased proportionately to the size of the material to ensure that the QR code can be scanned from a reasonable distance.

Regardless of the application, we strongly recommend testing the QR code at the seal's intended size to be sure the intended audience is able to scan it.

On packaging and marketing materials with more than one Rainforest Alliance seal in the layout, the initial or most prominent Rainforest Alliance seal must adhere to the sizing guidelines.

Reduced sizing may be approved for secondary (additional) seals in the design, or for very small products or materials where the recommended sizes will not fit.

Sizing guidance (Horizontal version)

Minimum size

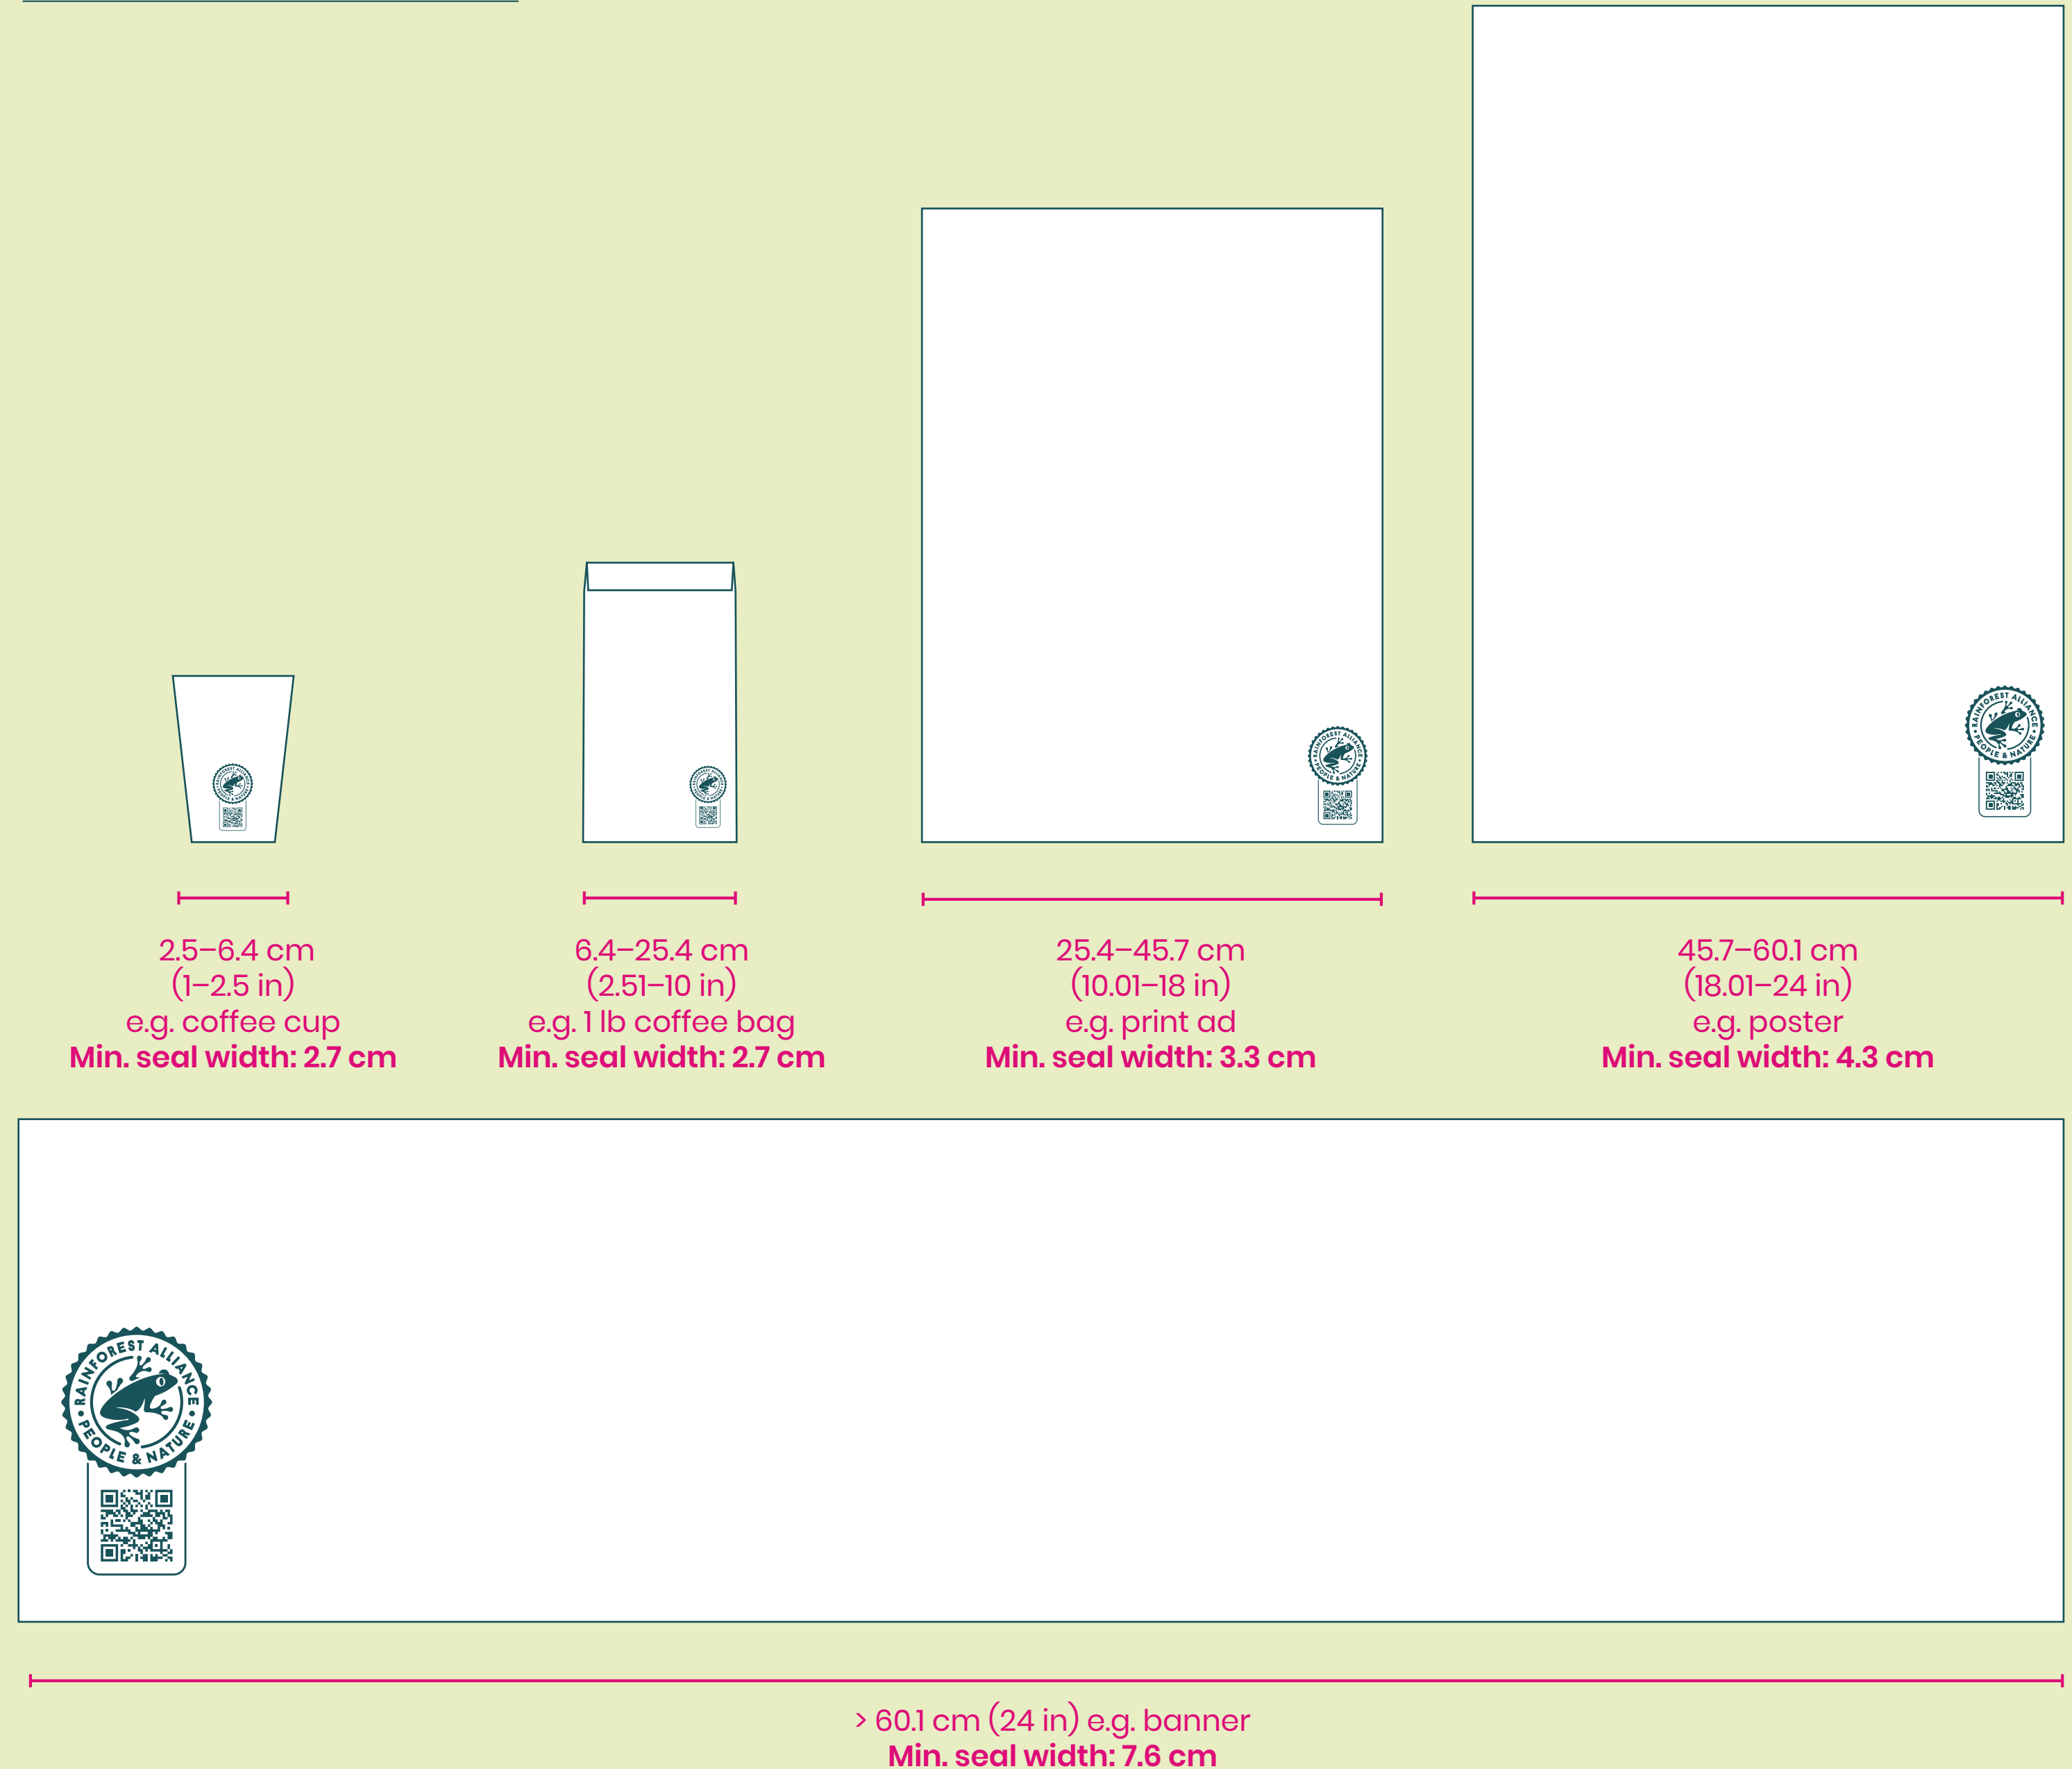

If you're using the seal on large marketing materials such as banners or displays, the size of the seal must be increased proportionately to the size of the material to ensure that the QR code can be scanned from a reasonable distance.

How to use the seal on different backgrounds

The visuals on this page show the correct and incorrect use of the Rainforest Alliance seal on example backgrounds.

1. The seal correctly placed on a solid color background.
2. The seal correctly placed on a variegated color background.
3. Seal in black and white for printing on black and white materials.
4. The reversed white seal may only be used where other text and graphics are also being printed in white over a darker background.
5. Seal in single color green on appropriate light background.
6. Seal in single color black on appropriate light background.

How not to use the seal

Please do not:

1. Change the color of the seals without explicit approval from Rainforest Alliance.
2. Alter the design or content in any way.
3. Pull graphic elements, such as the frog, out of the seal.
4. Decrease the size below 2.7 cm tall.
5. Invert one of the dark seal designs into the Reverse white seal, as the design is slightly different.
6. Add a panel around the Rainforest Alliance seal and/or product labeling in such a way that it seems part of the seal design.
7. Tilt the seal or distort it from the original ratio of dimensions.
8. Use a single color version on a variegated color background.

Product labelling

Many uses of the Rainforest Alliance seal require a qualifying word or statement to improve consumer understanding and increase awareness of the benefits of Rainforest Alliance’s work.

Product labelling requirements are determined by two main factors:

- a) Whether a product is made of a single, or multiple ingredients.
- b) The percentage of certified content used in manufacturing.

This is a brief guide to how product labelling should be applied.

Please refer to the full *Rainforest Alliance Labeling and Claims Policy* for more detailed guidance on product labelling requirements, eligibility and the permissions process.

The certified crop name below the seal must appear in Poppins SemiBold font (in Title case), center aligned beneath the seal. The crop name text should appear in a single color that matches the color(s) of the seal and should be clearly legible. The seal artwork with the crop name included is available for download in the Claims Platform. Please be advised that the seal artwork with the certified crop name included is limited to only a specific selection of crops.

The Poppins SemiBold font can be found and downloaded for free at: <https://fonts.google.com/specimen/Poppins>

(See appendix for typefaces to use for product labelling in languages that use non-latin alphabets, such as Arabic, Russian, and Greek.)

SHARING YOUR IMPACT

Brands going above and beyond certification

Rainforest Alliance certification isn't a tick-box exercise or a one-size-fits-all program. For brands that are going above and beyond our minimum standard certification requirements, you can share your progress and impact with claims.

View our tools to help you market your products with our seal at <https://www.rainforest-alliance.org/business/marketing-sustainability/using-our-logo-and-seal/>, or contact us at marketing@ra.org to join us on this journey.

Using the Rainforest Alliance logo

The Rainforest Alliance logo—which is distinct from the certification seals discussed earlier in these guidelines—may be used by organizations that wish to denote a cause marketing relationship, or to represent another partnership (e.g. corporate advisory) with the Rainforest Alliance.

The Rainforest Alliance logo can be used **only** for off-pack claims. The logo shall therefore not appear on product packaging, nor be used in reference to certification. Farm certificate holders and supply chain actors that wish to promote certified products shall use the Rainforest Alliance certification seal instead.

Please refer to the full [Rainforest Alliance Labeling and Claims Policy](#) for more detailed guidance on product labelling requirements, eligibility and the permissions process.

Rainforest Alliance logo

Reversed logo
for use on dark backgrounds

Exclusion zone

3 cm / 100 px

Minimum screen width: 100 px
Minimum print width: 3 cm

Using the Rainforest Alliance logo

When used on light colored materials or backgrounds, the Rainforest Alliance logo is available in our primary color of dark Forest green (Pantone 3165, or the equivalent CMYK or RGB values on the right) or black.

When used on a dark background, the reverse version of the logo, available in white, should be used. As the reverse version is not a simple inversion of the green or black logo, please do not attempt to manually re-color the logo, and instead use the files as provided.

The Rainforest Alliance logo may only be used in the approved colors shown here.

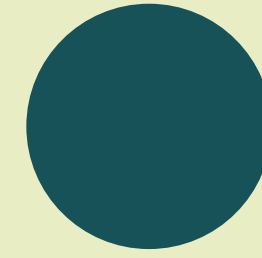

When using the logo, always leave a clear space around it equal to the height of the letter R in “Rainforest” or greater.

The logo should never appear smaller than 3 cm wide in print or 100 px wide on-screen.
